PROFESSIONAL SUMMARY

QA Engineer with over 4 years of experience in high-growth tech environments, including Shopee (Sea Labs) and Astra Life. Expert in designing and scaling automated testing frameworks for Microservices and high-traffic features. Proven track record in AI-driven testing and collaborating with international teams (Singapore/Shenzhen). Strong background in CI/CD integration, API testing, and Automation Testing using Python, Playwright, Selenium, and Robot Framework.

EXPERIENCE

Software Quality Assurance Engineer

Shopee

July 2024—Present, Jakarta, Indonesia

- Owned end-to-end quality for the PDP and Rating features, building comprehensive test suites and managing the full bug/defect lifecycle with data-driven prioritization to maintain a high bar for product stability.
- QA in charge of backend automation regression, streamlining weekly cycles and cutting manual overhead for production releases, while driving broader adoption of internal QA and AI-assisted testing tools to accelerate test generation, execution, and analysis across the Cart/PDP/Rating team.
- Collaborated cross-functionally with engineering and product stakeholders across Singapore and Shenzhen to uphold consistent quality standards in a distributed, international environment.

Automation Software Quality Assurance Engineer

Astra Life

April 2023—June 2024, Jakarta, Indonesia

- Spearheaded the adoption of automation testing from the ground up, establishing a modern QA culture and owning end-to-end automation efforts across the team.
- Designed, implemented, and maintained a robust CI automation pipeline on GitLab, while developing and refining test scripts in Python (Selenium) and Robot Framework.
- Partnered closely with Business Analysts to translate their requirements into effective automated test coverage, ensuring quality was built into every stage of delivery.

Junior Software QA Engineer

KitaLulus

Sept 2022—March 2023, Remote

- Expanded automation test coverage while mentoring fellow QA engineers in developing their own automation scripts, strengthening the team's overall testing capability.
- Led scrum rituals for the QA Automation Squad, driving sprint planning and execution.
- Served as code reviewer for the automation script codebase, upholding code quality and consistency across the team.

EDUCATION

Bachelor of Engineering in Information Technology with a Software Engineering Emphasis

Gadjah Mada University - Yogyakarta • 2022

Awards and Activities

- Finalist - CIMB 3D Conquest
- Finalist - BRI x Google Cloud Hackathon
- 4th Runner-Up - DILo Hackathon Festival
- Staff - KMTETI UGM
- Software Engineer - GMAT UGM

SKILLS

SDLC, JavaScript, Python, Playwright, Robot Framework, Selenium, SQL, Manual Testing, Regression Testing and Automation Testing.
